

## Make up ages 3 – 6

Eye, Cheek, Shimmer and Lip Color made for these little faces can all be found "Pretty N Pink" 5 Color My First Recital Compact. Includes EyeShadow Define/Liner in Burgundy Plum, Warm Taupe for Balance and Champagne Shimmer to Highlight eyes and cheekbones. Sweet Pink Cheek color and Raspberry long lasting Lip Color. This is marked on the bottom of the compact.

Brows are very important as they draw the focus to the eyes and with the application of eye makeup being softer at this age a perfect brow to frame those eyes is a must. Use a brow pencil to lightly define the brows in a shade that is the same as the child's hair color.

Apply the eye makeup first to avoid messes.

Eyes– Use the "Pretty N Pink" 5 Color Pallet. Define eyes with the Burgundy Plum color in the outer corner. Balance with medium Taupe shade just above crease across eye bone. Highlight with the light cream shimmer eye shadow onto the lid and under brow. Using a wet Liner Brush, line just at outer corners to open eyes. Do not meet lines.

Mascara in black applied to the upper lashes opens eyes even more. we suggest using the Ardell brand in "Black Wispies Cut lashes into tiny pieces and glue just add the outer corner as shown on our model to open eyes even more

Cheeks– Apply the soft pink flush shade high on the cheek apples. Perfect to compliment the costuming that this age group often is performing in. On the cheek bones apply the soft cream shimmer Highlight to add dimension to the bone structure.

Skin tone– Children have lovely skin but can easily flush on stage making skin tones look uneven. Cheek flushing from performing can distort blush color application and create a blotchy appearance. Be sure skin is properly hydrated so foundation and powder go on easily and look smooth. Set with a translucent face powder in their skin tone. Avoid Mineral Makeup as this is light reflective and can distort features under stage lights.

Lips– Lips on children are so small and from a side view often haven't filled out. Applying a lip shade can be difficult as the lips are small and hard to apply color too. Using a Lip Brush whenever possible can make the application easier.
